ONTARIO KNIFE CO™

OKC® *HIKING KNIFE*

Traveling the trails means trusting your equipment and this lightweight piece comes in at only 5.6oz, 7.2oz in the sheath, which means the OKC® Hiking Knife won't add any unwanted weight to your belt or pack. A durable stainless-steel blade and full tang provides piece of mind that it won't let you down. Combined with a stylish micarta handle and leather sheath, the hiking knife won't be just a knife, but a trusted tool. With a slim profile this piece doesn't take up much real-estate and is the perfect companion for any trip.

▷ ADIRONDACK *SERIES*

The ADK hunters are named for the long hunting, trapping and fishing tradition that is associated with the Adirondack Mountains of New York State. The High Peaks Hunter is named after the famous 46 High Peaks of the Adirondacks. The narrow blade, the expanded blade belly and the fine point is designed for quick, efficient gutting and can also be used for smaller game or as a caper. The Keene Valley in the Adirondacks is known as the gateway to the High Peaks and the communities of the valley supplied many of the local hunting guides. The broad, flat ground blade has a superior cutting/slicing geometry perfectly designed for skinning large game but also has a profile that is ideal for any cutting application.

ADK HIGH PEAKS HUNTER #8178

▷ OVERALL LENGTH	9.44IN (24cm)
▷ BLADE LENGTH	3.6IN (9.1cm)

▷ TAK 2®

Making an expansion to the RAT® Series means creating something that has the same dependability this line is known for. With the TAK 2® we have gone beyond simply creating a new item, we've created a knife and handle combination that exudes comfort and a reality that you're getting even more from an already dominant fixed blade series. Phosphate coated high carbon steel with stabilized hardwood handle scales complimented by a high-quality leather sheath make this knife unbeatable.

▷ OVERALL LENGTH	9.9IN (25cm)

CAMP PLUS *HATCHET*

A cross between bushcraft and tactical, the Camp Plus hatchet offers the best of both worlds. Just shy of a 3 inch cutting surface and forward weighted for great chopping momentum, this tool isn't just comfortable in hand but strong. Tactical styled, micarta handle scales and a solid piece construction, The Camp Plus hatchet is a dependable, American made tool that proves quality is still home grown!

OKC® BESRA

The OKC® Besra is the brother to the OKC® Shikra. Some slight differences to the handle profile and a new blade shape set these two apart. Maintaining the same construction materials with a linen micarta scale, titanium frame lock and AUS-8 stainless steel blade with black PVD coating, the Besra is another tough and affordable Hawk of a knife that will quickly become an everyday carry favorite.

▶ OVERALL LENGTH	7.2IN (18.3cm)

STAINLESS

OKC® Ti 22 *ULTRABLUE*

Ti 22 is Titanium and Titanium means strength. With a handle and frame lock completely constructed of a high-grade material like Titanium you can trust that the Ultrablue will be as dependable as it is colorful. With an iridescent oxidation, the handle's color shifts from a deeper blue to a purple similar to an Ultraviolet hence the name Ultrablue.

▶ OVERALL LENGTH	7.44IN (18.9cm)
▶ BLADE LENGTH	3.03IN (7.7cm)
▶ BLADE MATERIAL	STAINLESS STEEL
▶ BLADE HARDNESS	52-55HRC

OKC® BLACK BIRD *ML5*

The Black Bird ML5 maintains the same great shape as the original Black Bird Series. Upgraded handle scales to multicolored Micarta, 420HCSS blade and a black, leather sheath create a more affordable option for the consumer. This knife is still a great companion for any outdoorsman while bushcrafting, camping, hunting, hiking or all of the above. The leather sheath with belt loop attachment adds easy and secure carrying to this piece along with the extremely durable micarta handles for comfort and rigidity.

ADK

ADIRONDACK SERIES

The ADK hunters are named for the long hunting, trapping and fishing tradition that is associated with Adirondack Mountains of New York State. The state park was founded in 1892 and it's six million acres make it the largest park in the contiguous United States. Long the center of outdoor sports in the northeast it is associated with the Great Camps, pristine forests and water and a variety of unusual local characters.

High Peaks Hunter- the High Peaks Hunter is named after the famous 46 High Peaks of the Adirondacks. The narrow blade, the expanded blade belly and the fine point is designed for quick, efficient gutting and can also be used for smaller game or as a caper. The hilt is designed for precise edge alignment using the forefinger as a guide and the narrow taper in the butt minimizes the hilt cross section so the blade can be rotated for reaming cuts.

Keene Valley Hunter- the Keene Valley in the Adirondacks is known as the gateway to the High Peaks and the communities of the valley supplied many of the local hunting guides. The broad flat ground blade has a superior cutting/slicing geometry perfectly designed for skinning large game but also has a profile that is ideal for any cutting application. The flat cross section of the hilt and swell at the butt aligns the hand with the blade edge for the precisely controlled cuts necessary for skinning large game.

▶ ROBERT CARTER *SERIES*

OKC's® collaboration with Robert Carter started with the Carter Prime and continues with the Carter 2quared and Carter Trinity. All three knives feature titanium handles, with the Trinity featuring a beautifully contrasted G10 handle scale. Each knife is designed to be a durable and versatile every day carry that makes you better prepared to get any job done.

THE TAK 2®

is the newest addition to the popular RAT® Series that Ontario Knife Company® has been producing for over a decade. The original lineup that most are familiar with have tan, micarta handle scales, phosphate coated, high carbon steel blades and nylon sheaths. The inspiration for this piece was to add something fresh to this already well established fixed blade line. Adding the quality of stabilized hardwood handles and a leather sheaths has helped elevate other members like the RAT® 3, 5 & 7 for their introduction as the Adventurer series.

Taking a step in a new direction for a design aesthetic allows the TAK 2® to stand out from the rest of the line. The honey gold hardwood handle contrasts against the black blade and sheath which is a big departure for OKC's normal look which typically maintains black blade, black handle or stays in Earth tones. In comparison to the TAK 1® , the 2 boasts a larger belly and a more robust handle size. The larger blade will bode well for outdoorsmen looking for a knife with the capacity to skin game and process outdoor tasks more easily than the thinner width of the TAK 1®.

This new addition, though different, maintains the same great quality manufacturing that one is used to from Ontario Knife Company's American made fixed blades. High carbon steel and full tang construction are a staple of this series and allows for dependability and trust in a great tool.

I&A *SERIES*

Ontario Knife Company's industrial and agricultural knives have developed over the years to include a wide variety of products based on evolving customer demands. These fruit, vegetable, field, harvesting, table and construction knives feature either a high carbon steel blade with hardwood handles or a stainless blade and a molded plastic handle. These versatile, all-purpose knives may be used to multi-task harvesting, digging and industrial cutting applications.

OLD HICKORY[®] SERIES

First introduced in 1924, the Old Hickory[®] knives are the most venerable product line still in active production. The Old Hickory[®] knives feature a hardwood handle secured with brass compression rivets to high carbon steel blades that are both very sharp and capable of retaining and edge better than most stainless knives. Proudly manufactured with artisan processes for over 90 years, Old Hickory[®] has stood the test of time and is proven to be the best carbon steel kitchen cutlery sold today.

AGILITE[®] SERIES

The Agile[®] line was designed to be the most lightweight, durable, ergonomic, and advanced cutlery produced by Ontario Knife Company. Engineered down to the edge geometries by blade-master Dan Maragni, the Agile[®] knives are technically superior to almost any cutlery in the market. Featuring double injection heat resistant molded handles and Sandvik 14C28N[™] fine carbide steel, the Agile[®] knives define premium cutlery. However, true to form for OKC[®] products, they are affordably priced.

AGILITE[®] CHEF'S KNIFE #2520
